

Andheri / Dadar / Chembur / Thane / Borivali/ Nerul / Powai

Dear Student,

The countdown to April 11th: IIT JEE day has begun and you will be appearing for the IIT JEE exam for which you have worked hard for years. Based on my own experiences and the experiences of my past students, I wish to give you some advice which may make a little difference and can help you improve your performance in the exam .

Believe in yourself

The first step is to maintain a very positive and cool mental attitude. Tension or anxiety has to be avoided. Getting nervous, panicking, thinking about the outcome of the exam, worrying about the unfinished portion,.....etc, is not going to help you in any way. These things will only waste time and demoralize you. Utilize your time in these last few days productively by revising and practicing previous year's papers. Try to develop the exam temperament and strategize to finish the papers in time by practicing. Be sure that you are going to be the winner and I assure you, YOU WILL. This is the best formula you will ever learn and I completely believe in it:

“One, who wins, is the one who thinks, he can. “

Body cycle

Mould your body cycle so that your concentration levels are highest during IIT JEE 2010 exam timings. This point has always been understated. Just like we tune our bodies to wake up at, say, 7 am everyday; the concentration levels can also be tuned to be highest at certain time of the day. To achieve this, avoid irregular sleeping and waking times. Schedule your daily activities everyday assuming as if it's April 11th and follow this till JEE. Most importantly, create exam like conditions and take all the mock tests during the timings of the JEE. Not only will this tune your concentration, but it will also enable you to cope with stress.

What should I study in these last few days ?

The focus has to be on revision and one must strengthen the topics which one has studied earlier at least once. At this stage one should prefer not to study a new topic. Instead one should try to be strong in the topics which one has already finished earlier. A few topics which one has never touched can be avoided safely. The logic is , if you attempt 90% paper and if you do it fully correct you can be JEE 1 .

Be extra careful about small things like carrying your hall ticket , reaching in time , carrying few sharpened pencils and an eraser, avoid carrying mobile to the exam hall , on the exam day .

One should reach much before time at the center, avoid too much talking , stay cool and calm with proper deep breathing , be well prepared with your hall ticket , ensure you are aware which room you have to sit in without getting hassled . Parents must ensure that they visit the center once personally once before the exam day. They must help the child in locating the center and the room without letting the child getting worried. A right frame of mind is extremely important and advance preparation helps. After getting seated one should do some deep breathing and let your brain get more oxygen for few minutes till you are given the papers.

Once you get the papers:

1. One must read the instructions very carefully.
2. Fill in your name and roll number with great care, a small mistake here may ruin you forever, be very, very careful about this.
3. Keep your mind open. IIT JEE is known for throwing surprises by changing the exam pattern or introducing new style of questions where one has to be very careful about the instructions given. If there is anything new, it is new for everyone, so don't waste time cribbing or worrying. Be the best one to perform in whatever be the given conditions. You have to be faster and better than others, relatively, be it a tough paper, be it a new pattern
4. If by any chance you discover some fault in the JEE paper (which is rare), you are not going to get a Noble prize for pointing it out to the invigilator and even the invigilator has no authority to change it all over India. So even if there is a mistake and even if you are sure, skip it and move on. That question will be disqualified in any case or you were making some silly mistake. In any case do not waste your precious time to gain the glory. Move on, there will be question you may be knowing and might fall short of time, so keep going, let others get the joy of highlighting the mistakes, you earn marks.
5. In the first round just do the questions which are getting solved easily and any question which you find tough or seems to be time consuming should be left and attempted in the second round. There should not be a single question which you could solve easily but you couldn't reach it because you got stuck on some question which was time consuming or you were not sure of. This is the best strategy and is followed by most top rankers every year.
6. Chemistry is the easiest and least time consuming of all the three subjects and hence should be attempted first if you are good in chemistry and generally Mathematics is the toughest and most time consuming and hence should be attempted last. Sometimes one can take a decision then and there depending on the toughness of the paper and your strength. One may also prefer to attempt his favorite subject first. But the rule that any problem which appears tough or is too time consuming must be skipped immediately. One has to reach till the end and ensure that everything which was easy, even if it was in the end of the paper, has been attempted. One has to ensure that even a single mark which is easy must not be missed.
7. During the exam just concentrate on yourself. There are funny and insincere people who will be creating stupid and funny situations and sounds as many of them have just come to the exam because of their parents. You must not let yourself get distracted by such elements or by their behavior.
8. During the mid, that means say after one hour of the exam one finds a little slowdown in the thought process at such moments one has to breathe properly and become active by mentally and physically shaking himself. Your sitting posture should also be correct.
9. One should not eat heavy food in the morning or in the lunch on JEE day. One should eat fruits like grapes, banana or light but energy giving food. Glucose powder or a chocolate will keep you energetic but no overdose also.
10. After the first paper one should never discuss it with friends at all. Simply give yourself a complete break and relax and recharge. Take a nap for an hour and wake up one hour before the next paper, is the ideal thing.
11. Due to any reason even if the first paper was tough or maybe you couldn't perform really well, please do not let it affect your performance in the next paper.

Most students will try to show off their friends and parents that they have done the full paper and you might unnecessarily demoralize yourself. Simply try to do your best. Do not even try to find the reaction of others about the first paper. If it was a tough paper, it was tough for everyone and if it was easy, it was easy for everyone. You have to do your best, that's it.

Though this is time for Self study and revision, Please feel free to approach our faculties through your branch managers.

Center	Branch Manager	Contact Number
Andheri	Kawal Madam	9820788282
Dadar	Vishal Sir	9223901583
Powai	Sahil Sir	25798471
Thane	Deepika Madam	9819794728
Nerul	Joshi Sir	9004312557
Chembur	Vidhya Madam	65891583

The Branch Managers will help you and arrange for personal sessions with our faculty as per your requirements. In case you need further help, feel free to contact Kuldeep Tyagi Sir (9821104011)

We are also pleased to announce that many renowned faculties from all over India have joined us recently.

Recent Additions in our Team

Prof. Arun Roy (B. Tech. IIT – Bombay, Founder of Arun Roy Classes) for Physics,
Prof. Soumya (B. Tech. IIT- Bombay) for Physics.
Prof. Ankit Padlia (B. Tech. IIT- Bombay) for Physics,
Prof. Deepak Mishra (B. Tech. IIT- Bombay) for Physics,
Prof. Nipun Katyal (B. Tech. IIT- Bombay) for Physics,
Prof. Sambvit Bissa (B. Tech IIT - Bombay) for Chemistry,
Prof. Mahendra (B. Tech. IIT – B) for Chemistry,
Prof. Ankur Verma (B. Tech. IIT – B) for Chemistry,
Prof. Saurabh Priyadarshi (HOD Brilliant Tutorials, Delhi) for Maths,
Prof. Srinivasalu (AIR -34, B.Tech. IIT - Bombay) for Maths,
Prof. Mohammad Thauseef (B.Tech IIT – G) for Maths,
Prof. Manoj Saigal (CET -1996 topper ; B.Tech from VJTI gold medalist) for Maths,
Prof. Vaibhav Chimpa (B.Tech IIT –Bombay) for Maths,
Prof. Piyush Gaware (B.Tech IIT –Bombay) for Maths,

Labour never goes in vain. I am sure your efforts and hard work will fetch you the desired results. All my teachers who have groomed you for two years join me in conveying our best wishes and whole hearted blessings to you. God bless you all.

Praveen Tyagi ,
