

EVS Projects topic	Roll No					
	101	128	159	186	307	612
1. Management of solid waste in our city	101	128	159	186	307	612
2. Forest Conservation	102	129	160	187	308	613
3. Mangrove conservation in Mumbai	103	130	161	188	309	614
4. Possible ways to reduce river pollution	104	135	162	189	310	615
5. Flood control/Pollution control measures on bank of river Mithi	105	136	163	190	311	616
6. Impact of air pollution on human health	106	137	164	191	312	617
7. Natural Disaster Management	107	138	165	192	313	618
8. Effect of overuse of water by people on ground water level	108	139	166	193	314	619
9. Benefit of organic agriculture over chemical intensive agriculture	109	140	167	194	315	620
10. Effect of biogas uses on house hold expense	110	141	168	195	316	621
11. Use of sewage water for irrigation	111	142	169	196	317	
12. Conservation of renewable resources	112	143	170	197	318	
13. Loss of Biodiversity	113	144	171	198	319	
14. Cause of extinction of many species (Plants and animals)	114	145	172	199	320	
15. Green Movement and it's impact on global warming	115	146	173	200	321	
16. Use of public Transport for reducing purchase of fuel	116	147	174	201	322	
17. Rain water harvesting	117	148	175	202	323	
18. Ground water level	118	149	176	203	601	
19. New emerging disease	119	150	177	204	602	
20. Green – surrounding as on important part of human well - being	120	151	178	205	603	
21. The quality of water and soil affect the lost of farming	121	152	179	206	604	
22. Effect of soil pollution in farming	122	153	180	301	605	
23. Organic agriculture	123	154	181	302	606	
24. Forest conservation	124	155	182	303	608	
25. Possible ways to reduce river pollution	125	156	183	304	609	
26. Importance of solar and wind energy	126	157	184	305	610	
27. Danger and health impact of tobacco consumption	127	158	185	306	611
